

I am 55 years old and enjoy XM radio. I pay 10 bucks each month and XM should be able to transmit anything that is not against the law. Local radio has it's place and I listen to them also. Biggest advantage is when traveling to a town and not knowing the radio stations, one can get travel information immediately. If XM radio was free, then I agree with the broadcasters. I pay 10 bucks and should be able to listen to better quality radio!
